WAKE UP TO  
*Glamorous*  
LONGER LASHES  
EVERY DAY

Elleebana Eyelash Extensions are individual, long lasting lashes, applied directly onto your natural lashes using a medical grade adhesive giving you the appearance of longer and thicker eyelashes. Eyelash extensions come in a variety of lengths, thicknesses and curls to achieve your desired look.

You can also combine eyelash extensions with a semi-permanent mascara application on the lower eyelashes to create the ultimate eyelash enhancement.

Your eyelash technician will customise a look that will suit your lifestyle and personality, from natural to a luscious, glamorous look.

#### ABOUT THE APPLICATION:

Eyelash Extensions are grafted to your natural lashes and with proper care and maintenance will last you the life of your natural lash cycle, with refills recommended every 2-4 weeks.

Please note that your natural lashes all grow at different times with a life span of 6-8 weeks. Talk to your Eyelash Technician about how you can have luscious, longer lashes today.

#### HOW TO LOOK AFTER YOUR LASHES:

*The first 24 hours are crucial to the longevity of your Extensions*

- Avoid excess moisture or hydrogen for the first 4 hours after application
- Avoid oil & oily products around eyes, including moisturisers.
- Avoid excess steam and heat
- Avoid using eyelash curlers, mascara and only use powder or non-oil based eyeliners
- Avoid excess swimming in oceans, which contain lots of natural oils and salt, which can affect glue over time
- Daily brushing and cleansing with an approved makeup remover
- Try sleeping on your back so the side lashes are not crushed at night
